

Safe and smart with the Ecotour

To ensure your safety, we politely ask you to observe the following guidelines and to inform all participants in the tour of these guidelines beforehand.

In case of non-compliance, participation in the tour is not possible.

1. A maximum of 20 participants per guide. Groups of more than 20 people will be divided into several groups and taken through the plant in stages.

2. Please clean your hands with disinfectant before entering the Ecotour container. Please cough and sneeze into your elbow, never into your hands.

3. Strong magnetic field in the plant! Access while wearing a pacemaker or similar device is discouraged and must always be reported before the tour begins.

4. You must wear firm footwear. People with a walking disability or a fear of heights should refrain from visiting (we have many meshed floors and steps).

5. If possible, please bring your own headset with AUX cable connection with you to the tour. If you are unable to do so, disposable headphones will be provided.

6. Smoking is prohibited throughout the premises.

7. Audio recording, photography and filming are prohibited throughout the premises.

8. Liability for damage is excluded, where legally permissible.

We hope that you enjoy your visit to our plant!

Our Helping Hands Association would like to thank you for your donation.
